PROFESSIONAL SUMMARY

I am a full stack MERN developer focused on building scalable, production-ready web applications. With hands-on experience in frontend and backend development, cloud deployment, and real-time systems, I have worked on taking products from concept to deployment. My interests include clean system architecture, performance optimization, secure authentication, and building reliable software systems that deliver real-world impact.

EDUCATION

National University of Sciences and Technology (NUST), CEME Rawalpindi, Pakistan
Bachelor of Engineering in Computer Engineering

INDUSTRIAL EXPERIENCE (INTERNATIONAL & REMOTE)

MERN Full Stack Developer (Full-Time) Nov 2025 – Present
Zapply (USA, Remote)

- Developing and maintaining scalable MERN-based applications for production environments.
- Implementing secure authentication, role-based access control, and optimized RESTful APIs.
- Collaborating with cross-functional teams on system design and feature delivery.

MERN Full Stack Developer (Full-Time) Aug 2025 – Nov 2025
3Dim (China, Remote)

- Built and deployed full-stack features using React.js, Node.js, and MongoDB.
- Improved API performance and frontend responsiveness.

Freelance Full Stack Developer Jun 2023 – Present
Fiverr (Remote)

- Delivered end-to-end web solutions for international clients, including dashboards, APIs, and authentication systems.

MERN Full Stack Developer Intern Jun 2025 – Aug 2025
Zapply (USA, Remote)

- Assisted in building production-ready MERN features and backend services.

AI / ML Intern May 2025 – July 2025
CARE

- Worked on machine learning and computer vision tasks involving classification and model evaluation.

SELECTED PROJECTS

Workify Full Stack Freelancing Platform | React, TypeScript, Node.js, MongoDB Live

- Built a Fiverr-inspired freelancing marketplace with buyer and seller dashboards.
- Designed scalable cloud architecture using Vercel, Render, MongoDB Atlas, Redis Cloud, and Azure Blob Storage.
- Implemented JWT-based authentication and secure media uploads using SAS tokens.
- Optimized backend performance using indexing and Redis caching.

Full Stack Social Media Application | MERN Stack

- Developed a social media platform supporting posts, likes, comments, and media uploads.
- Implemented JWT authentication, bcrypt password hashing, and GridFS-based media storage.

Real-Time Chat Application | MERN, Socket.io

- Built real-time messaging with online status tracking and media sharing using Socket.io.

AI-Powered Document Assistant (MERNBot) | MERN, OpenAI API

- Integrated GPT-based document summarization and real-time chatbot Q&A functionality.

TECHNICAL SKILLS

Web & Backend: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, JWT, Redux Toolkit

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: Docker, GitHub Actions (CI/CD), Vercel, Render, Azure Blob Storage

AI / ML: Python, TensorFlow, Keras, Scikit-Learn, OpenCV

Programming: Python, JavaScript, TypeScript, C++, Java

CERTIFICATES

- Machine Learning Specialization [Coursera](#)
- Deep Learning Specialization [Coursera](#)
- Computer Vision and Image Processing [Coursera](#)
- Advanced Computer Vision with TensorFlow
- OpenCV [freeCodeCamp](#)
